Deployment

Deploy through the portal

- Get a good understanding of what's going on
- For quick and dirty deployments
- Use as a code generator

Deploy through Visual Studio Code

- No Azure subscription needed
- Quick debugging
- Direct connection

Prerequisites

- Install [PowerShell Core](#)
- Install [Visual Studio Code](#) on one of the [supported platforms](#).
- Install [PowerShell extension for Visual Studio Code](#).
- Install [.NET Core SDK 2.2+](#) (required by Azure Functions Core Tools and available on all supported platforms).
- Install version 2.x of the [Azure Functions Core Tools](#).
- You also need an active Azure subscription.

If you don't have an [Azure subscription](#), create a [free account](#) before you begin.

Deploy through Azure DevOps

- Professional deployment process
- Full Deployment pipeline
- Default tasks

Show case: A raffle

A raffle

- Create a frontend where people can enter their name
- Create a function to get a random winner

... Challenge accepted!
